

# DonorBridge

See the Change, Be the Change.

A photograph showing a group of four people in a modern office environment. Three individuals are seated around a light-colored wooden conference table, while one person is seated across from them. They appear to be engaged in a professional discussion. The office has a high ceiling with exposed steel beams and concrete pillars.

# Problem Statement

- Lack of **Transparency & Trust** in Donations
- **Inefficient** Fund Allocation
- Limited Accessibility for **Unbanked**

# The Solution

1

**Blockchain-Inspired  
Token Tracking**

2

**Utilize AI for  
Urgency-Based Fund  
Distribution**

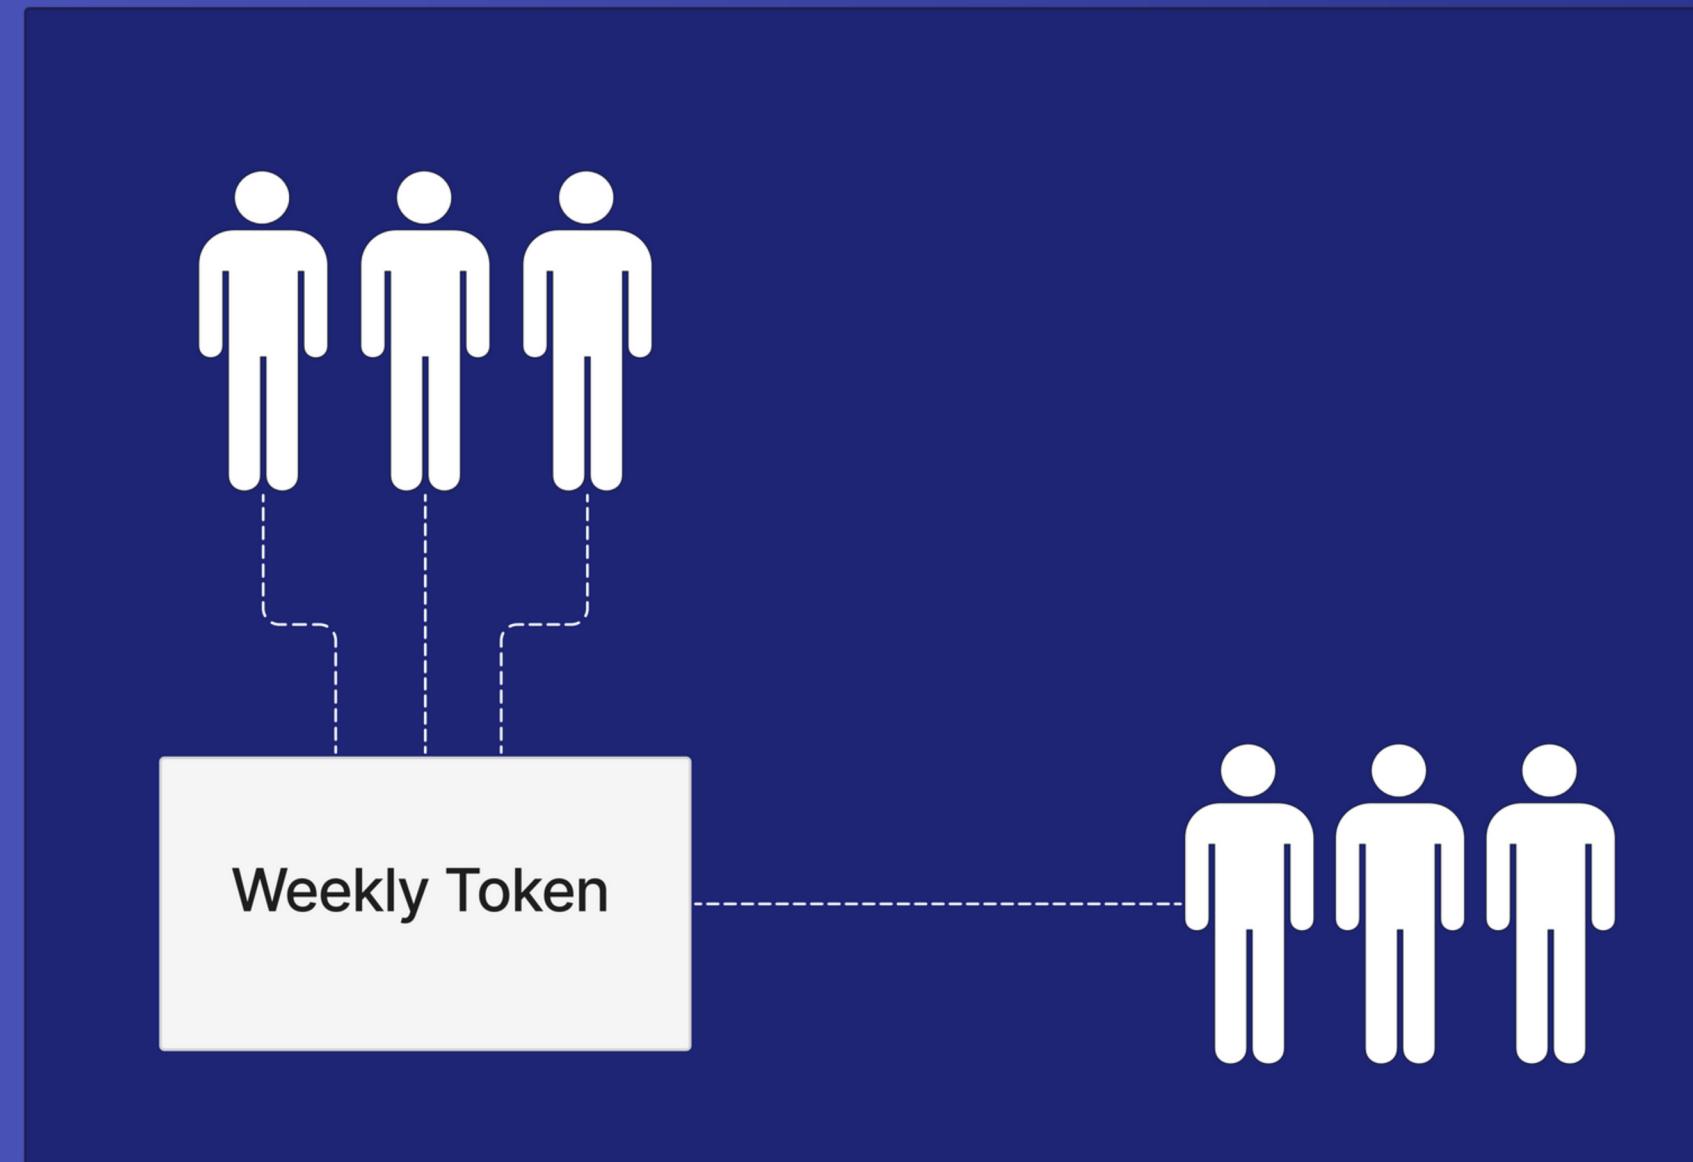

3

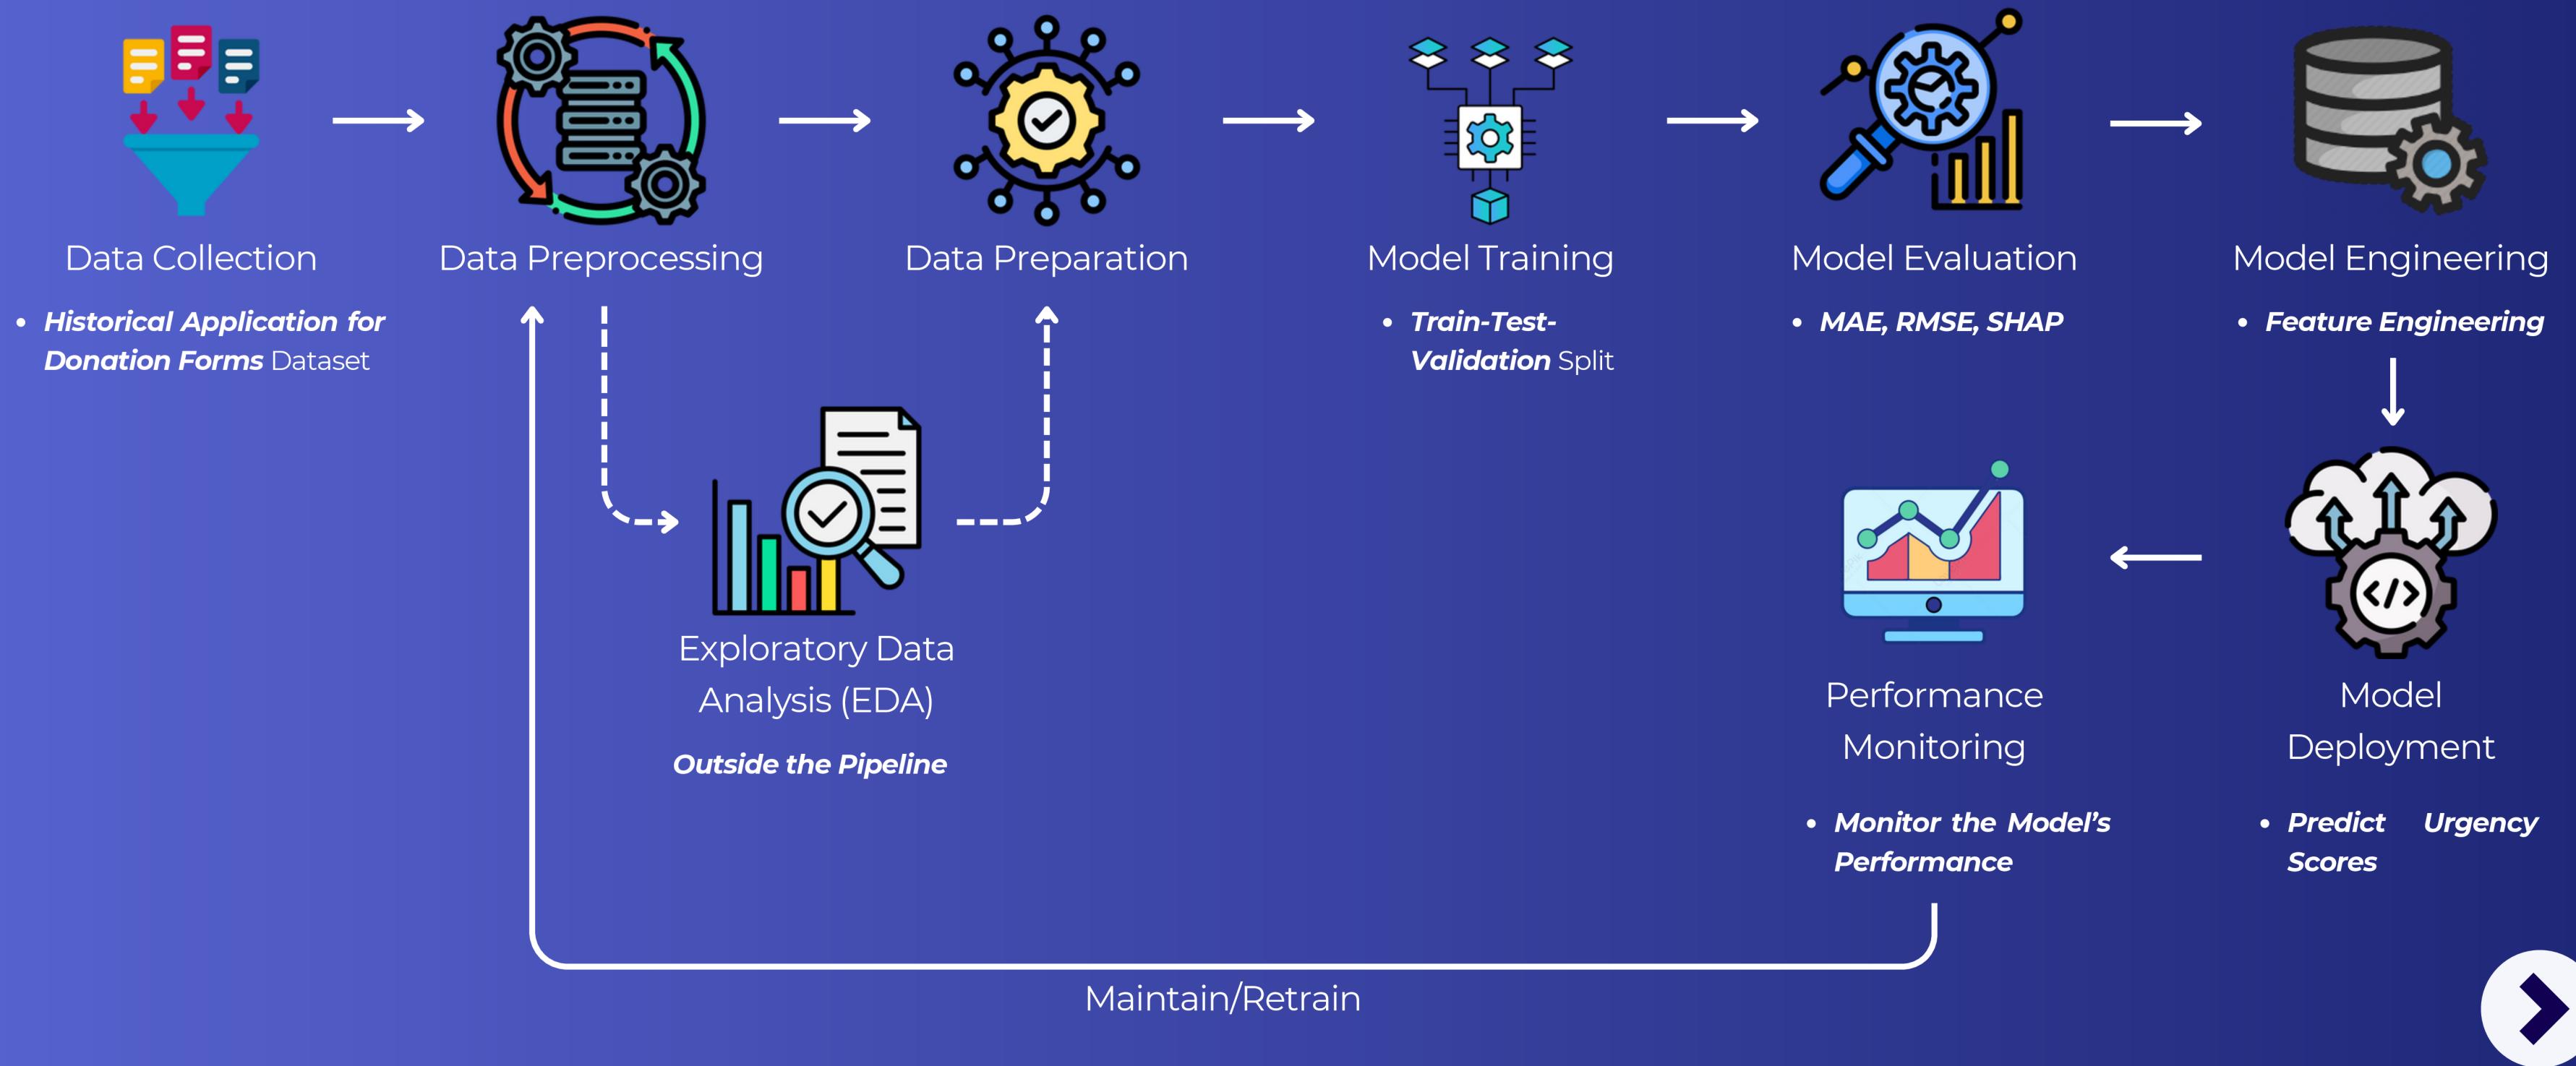

**Accessible Interface  
for Both Donor and  
Recipients**

# TOKEN CONCEPT

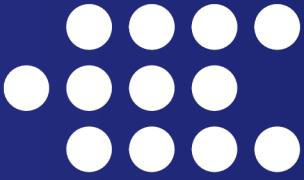

# ML CONCEPT

# LIVE DEMO

# Scalability

# OUTCOME

01

**Efficient, Fair & Intelligent Fund Distribution**

**No Bias**

Receiving the Help They **Deserve**

02

**Inclusions of the Unbanked**

Reaching out to **Unseen** Communities

**Engage** with Them

03

**Build Trust of Donor and Engagement**

**Bridge the Gap** with Donor and Recipients

Make Donation **More Engaging**

# THE TEAM

**Looi Kai Jun - Developer / Team Lead**

**Choong Keat Hao - Developer / Figma Designer**

**Yen Jin Xuan - Developer / Idea Generation**

**Jane Lee - Developer / Backend**

# THANK YOU

# QNA

1. Why will charitable organizations chooses you over others?

**We offer transparency and also smart distribution, removing any bias that may happen on manual reviews, not to mention to prioritization for inclusive outreach for unbanked and offline communities**

2. How is this different from other donation platforms like GoFundMe

**Our project is shariah-compliant, with the aim to support offline communities and unbanked recipients**

3. Are the funds really distributed to the recipients? And how is it distributed?

**We distribute our fund to the charitable organization with the assigned recipients and then it is then passed to them. Funds can also be distributed as online transaction, cheques or cash**
